Stage 1 User Guides

Once a Project has been set up and you are a member of that Project ([See Administration Guide for details](#)), users can navigate the functionality of the EBNLab via the Main Navigation Panel, and the first tasks can be accessed through the Stage 1 Section of that panel as shown here.

One of the first things to do is to start adding Need Statements, but in addition to this, useful information is available in Stage 1 Guides including:

- [Drafting Need Statements](#)
- [Capturing Evidence](#)
- Scoring Need Statements
 - [Confidence Score](#)
 - [Evidence Score](#)
- [How to Prioritise Need Statements](#)
- [The Stage 1 Dashboard](#)

What is the problem?

What is the problem or issue?

A way to address...

What is causing the problem?

Evidence

Adding evidence

Add sources of research that help inform or support your Need Statement(s). [TI](#)

Add more evidence

Next step

Hint: The Orange Buttons

On the Pages in the 3 Stages on EBNLab, the main objective of any of these screens can be identified by the primary outcome or task of that screen being denoted by the orange action button.
